

Ravikant Verma

Senior Software Engineer

Hisar, Haryana • +91-9896479747 • ravikantverma167@gmail.com • linkedin.com/in/ravikant-verma-8b861b159

PROFESSIONAL SUMMARY

Experienced Senior Engineer with over 8 years of building high-performance, scalable systems in Freight logistics, e-commerce, and medical sectors. Proven expertise in designing and architecting microservices and distributed systems, with a strong track record of enhancing backend performance and database efficiency. Skilled in leading engineering teams and managing the end-to-end delivery of complex, business-critical applications. Proficient at translating technical challenges into reliable, maintainable solutions that clearly improve system performance and lower operational costs.

TECHNICAL SKILLS

Languages: Javascript (ES6+), Typescript

Front-End: Angular(2+), Angular Material, HTML5, CSS3, Bootstrap, Prime Ng

Back-End: Node.js, Express.js, MongoDB, SQL, Redis, Mongoose, Sequelize, RabbitMQ, RSMQ, Apache Kafka

Cloud & DevOps: AWS (EC2, S3), Docker, Nginx, PM2, CI/CD, GitLab, MongoDB Atlas, Kong API Gateway

Tools and Monitoring: Postman, Graylog, Zoho, Bugzilla, Jira, JMeter

WORK EXPERIENCE

Yatra Online Limited, Gurugram | Yatra Freight

Jul 2021-Present

Senior Software Engineer

Yatra Freight is a B2B freight forwarding platform enabling businesses to manage end-to-end cargo movement — including carrier coordination, shipment tracking, and freight documentation.

- Led and mentored a team of 5 engineers, overseeing sprint planning, code reviews, and end-to-end delivery of critical features.
- Architected and executed a dedicated **financial microservice** for invoicing and transaction management, reducing processing errors by **30%**, cutting costs by **70%**, and boosting transaction efficiency by **40%**.
- Migrated self-hosted MongoDB to **MongoDB Atlas**, optimizing database performance and infrastructure, resulting in a **40% reduction** in operational costs.
- Introduced **Kong API Gateway** as a centralized layer for routing, rate limiting, and authentication, strengthening system security and reducing auth-related overhead across services.
- Developed a sophisticated reporting microservice with **Angular-based visualization** to address intricate reporting needs. Integrated data from diverse databases into a centralized warehouse, providing flexible output options, including email attachments and Google Sheets synchronization.
- Seamlessly led the integration of the application with a **government e-invoicing system** and internal accounting tool, ensuring legal compliance while enhancing financial transparency.
- Strategically optimized system performance through various measures, resulting in a **40% decrease** in response times.

MethodHub Software, Mohali

Oct 2020 - Jul 2021

Senior Software Engineer

- Architected a user-friendly online portal facilitating smooth registration and onboarding for agents, vendors, and customers, resulting in a **35% reduction in onboarding time** and improved user experience.
- Developed robust RESTful API services to effectively manage credit policies and wallets for customers and vendors, ensuring efficient financial operations and accurate tracking.
- Migration of a legacy code of appointment booking system (medical domain) to Node.js, improving maintainability, reducing infrastructure overhead, and aligning the codebase with the team's core technology stack.

Code Brew Labs, Chandigarh

Sept 2019 - Sept 2020

Mean Stack Developer

- Led frontend development for **Royo** SaaS platform across Food Delivery, e-commerce, and Rentals sectors; optimized user experience, resulting in an overall increase in user engagement.
- Engineered a dynamic web app with configuration-based strategies, ensuring adaptability to diverse business models.
- Seamlessly integrated over **20 payment gateways**, ensuring a robust and flexible financial ecosystem.

Appligos, Mohali

Aug 2017 - Sept 2019

Software Developer

- Developed an application for a hospital job marketplace platform enabling hospitals to post requirements, manage vendor bids, and create/track service contracts.
- Developed and maintained a scalable backend service for a multi-provider notification service supporting email, SMS, and push notifications across Mailgun, Plivo, Firebase, and OneSignal — featuring reusable template management and scheduled job execution.
- Maintained and supported the **Archaeological Survey of India** government portal, implementing change requests, resolving issues, and coordinating with cross-functional teams to ensure smooth operations.
- Contributed to core modules of **Aqua Teams**, a workforce management system — implementing reporting features, enhancing existing APIs, and supporting real-time employee location tracking and device logging functionality.
- Integrated **Google Analytics** into the Aqua Teams platform to track user behaviour and interaction patterns, providing actionable insights that informed UI and performance improvements.

CERTIFICATION & TRAINING

Certification: MongoDB Associate Developer, MongoDB

Training: MongoDB Associate Data Modular, MongoDB

EDUCATION

Chandigarh University, Chandigarh

Master of Computer — Computer Application
